

IV. REMARKS

1. The specification is amended. Claims 1 and 15 are cancelled without prejudice. Claims 34-44 are new. Claims 2, 3, 5, 6, 10-13, 16-18, 20, 24 and 25 are amended to change the respective dependencies. Claim 33 is amended.

2. The claims are not unpatentable over Kadyk et al. ("Kadyk") in view of Ginter et al. ("Ginter") or Wantanabe et al. ("Wantanabe") under 35 U.S.C. §103(a).

Claim 35 recites a method for providing content in a wireless communication device. This includes forming a content packet that includes at least one content component for use in the wireless device. The content packet includes a data structure that includes at least information related to a description of the at least one content component and information needed by the wireless device to run the at least one content component. Forming the at least one content component includes supplementing the at least one content component with a data structure that includes at least information related to description properties of the at least one content component and information related to system attributes of the at least one content component. The content packet is then transferred to a distribution server for downloading to a wireless device. Each of these features are not disclosed or suggested by the combination of Kaydyk and Ginter or Watanabe.

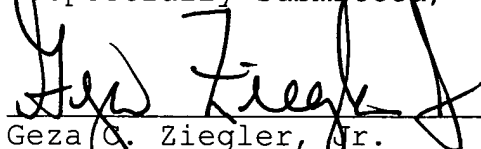

Applicant's invention is directed to providing contents for a wireless communication device. The contents, or applications for the wireless communication device, are formed into content components. These content components are then formed into content packets that contain information integral to the content

components, as well as system information that can be used to relate the content components to the properties of a particular wireless device. This is not the same as what is disclosed or suggested by the cited references. Thus, it is submitted that the claims should be allowable.

It is respectfully submitted that all of the claims now present in the application are clearly novel and patentable over the prior art of record, and are in proper form for allowance. Accordingly, favorable reconsideration and allowance is respectfully requested. Should any unresolved issues remain, the Examiner is invited to call Applicants' attorney at the telephone number indicated below.

A check is enclosed for \$1360 for the additional claims fee and one-month extension of time fee. The Commissioner is hereby authorized to charge payment for any underpayment of fees associated with this communication or credit any over payment to Deposit Account No. 16-1350.

Respectfully submitted,

Geza C. Ziegler, Jr.
